

Do you know how much it costs you to run your dust collecting system per month?

Cost of Fan Operation						
Per Year, 2 Shifts (16 hr. day / 5 days per week), 100% of fan load						
\$ per kWh →	\$0.10	\$0.12	\$0.14	\$0.16	\$0.18	\$0.20
Sys. Size ↓				Aver. cost in CA		
50 HP	\$14,400	\$17,280	\$20,160	\$23,040	\$25,920	\$28,800
100 HP	\$30,117	\$36,141	\$42,164	\$48,187	\$54,211	\$60,234
200 HP	\$60,139	\$72,167	\$84,195	\$96,223	\$108,251	\$120,279
300 HP	\$84,463	\$101,356	\$118,248	\$135,141	\$152,034	\$168,926
500 HP	\$150,593	\$180,712	\$210,831	\$240,949	\$271,068	\$301,187
1000 HP	\$301,187	\$361,424	\$421,661	\$481,898	\$542,136	\$602,373

Ecogate has already installed more than 11,000 gates and more than 1,100 control systems in the woodworking industry. The average **measured** savings on our Ecogate MASTER System installations is 68%. That means we can save you 68% of the above amount every year. For example with the Ecogate system you can save \$32,767 on running a 100 HP dust collector 2 shifts per year (at average electricity cost of 16 cents per kilowatt-hour).

Can your business afford not to save thousands or hundred thousands of dollars per year?

We are sure that in the current business conditions with growing foreign competition you need to save every dollar you can on production cost. Many U.S. companies are already saving unnecessary electricity costs with Ecogate System to lower their production costs. You can too.

What will the installation of Ecogate System cost?

You can pay for your system from energy savings. Here is how it works: The “**guaranteed**” monthly savings are large enough to enable a distribution of 90% to a “Paid By Savings” program and still keep 10% of the savings for net positive Cash Flow! You use this extra cash in your company rather than paying an unnecessary cost of electricity. Installation of the system is financed, and no down payment is required.

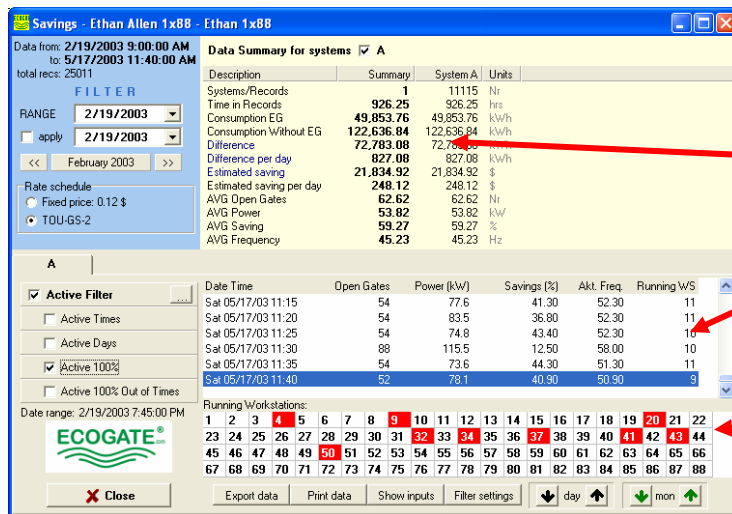

- You can **buy the system at any time** for the “fair remaining value of the system”.
- Payments will not continue indefinitely. When the Rental Payments have recovered all equipment and installation expenses, system and 100% of the savings is **YOURS!**

Sounds too good to be true?

We can offer this only to qualified customers, where we finish engineering and our savings evaluation shows opportunity of good savings. Our financial partner will check your credit rating. Here is what one of our customers said: "...most significant project Legere worked with Connecticut Light & Power (power utility company) was on an installation of an Ecogate System. (Vice president) Bruneau says it saves the company about \$7,000 a month, while the monthly lease cost is about \$2,000."

Is your company policy currently no Capital Expenditures at all?

In this case, a financial option "True Operating Lease" (no CAP EX) program is available. It only takes a few minutes to see if you qualify. System cost will completely be taken from the balance sheet, expensed monthly.

Example of a savings report downloaded to a Windows PC.

- Summary of savings
- One report every 5 minutes, 24/7, Database records
- Activity of your workstations at particular time

FAX BACK FORM (fax to 1-818-547-4005)

Yes, I have interest in evaluation if I can qualify for "Paid by Savings" or "True Operating Lease" program.
